Develop a 21st Century Personal/Professional Learning Network

Scott Meech

Joseph Sears School, Kenilworth, IL

This session is all about helping you develop your own 'Professional - Personal Learning Network'. As David Warlick said, "There is nothing new about personal learning networks. They are the people and information sources that help you accomplish your goals, either on the job or in your personal pursuits. Today, however, new techniques for organizing digital networked information, have enabled us to fashion new kinds of networks that extend far beyond our immediate location and face-to-face connections, and to grow our networks based not on explicit decisions, but through the ideas of others... people and resources whose ideas intersect with ours." Let's break down the classroom and school walls and create a network of like-minded professionals who we can learn from and share our ideas with!

Setup & Score your Own Local Assesments

Greg Gutkowski

Just 5 Clicks, Barrington, IL

Schools need to set up and score a variety of local assessments to keep track of detailed academic progress of students. *Just5clicks* developed four major ways to create and score such tests; bubble sheets printed on plain paper, data entry by teacher to a web grid already pre-filled with student names, online testing taken by students on computers and data entry via iPads, iPod touches and iPhones. We believe that the above described ways will be mixed and matched depending on grade, subject and availability of reliable internet connections.

Thinking Skills Instruction Should Be Offered to All Students

Denise Ahlquist
The Great Books Foundation, Chicago, IL

Scientific research shows that higher literacy depends on key instructional strategies. These strategies should be front and center in instruction for the gifted, but in fact they are seldom employed, especially in schools serving disadvantaged students, because they imply a paradigm change for the teacher. In this session, participants will experience these strategies as learners by participating in a lesson, and as observers by viewing classroom video, in order to learn to identify these strategies and to extend their use into classrooms.

Grade Levels: K - 12
Audience: Administrators, Teachers, Special Education

Planning for Restructuring

DeKalb High School, DeKalb, IL

The DeKalb High School Restructuring Plan was a collaborative effort between district administrators, high school administrators, classroom teachers, and our school assessment coordinator. One innovative aspect of the plan is that it was written using our RtI framework to identify specific actions, programs, and initiatives that will address needed areas of improvement. There are 12 Main points of the 2010 DeKalb High School Restructuring Plan. This plan was considered "exemplary" by Carol Diedrichsen, Principal Education Consultant ISBE, who reviewed the plan.

If You Build It They Will Come...

*Vicki Hensley/Nicki Rosenbaum
Iroquois/Kankakee Regional Office of Education,
Kankakee, IL*

Construction of the Induction for the 21st Century Educator (ICE 21) Initiative has been taking place in Illinois for the past decade. The construction crew consisted of ISBE, IASA, IPA, IFT, IEA Regional Offices of Education/Intermediate Service Centers, universities and of course new teachers. This session will introduce participants to the educational leaders' overview training, a one day approved Administrators' Academy, and the 4.5 days of training for district-selected mentors. A blue print will be shared showing how ICE 21 meets all ISBE requirements for induction programs plus lots more. Come join the 180+ school districts which have already experienced ICE 21.

5 Step Process to Learn How to Learn with Technology!

Scott Meech

Joseph Sears School, Kenilworth, IL

Most newcomers to the power of technology for education talk about a sense of being overwhelmed, the difficulty of determining where to start, and a steep learning curve once they decide to learn more. Instead of focusing professional development experiences on the 'cool' new tool or 'buzz' word, this presentation introduces an approach that focuses on 'learning how to learn' via technology. I will walk through the five-step process for helping educators in your schools put together a 'Life-Long-Learning Approach' including research tools, social bookmarking, blogging, social networking and more.

Setup & Score your Own Local Assesments

Greg Gutkowski
Just 5 Clicks, Barrington, IL

Schools need to set up and score a variety of local assessments to keep track of detailed academic progress of students. *Just5clicks* developed four major ways to create and score such tests; bubble sheets printed on plain paper, data entry by teacher to a web grid already pre-filled with student names, online testing taken by student on computer and data entry via iPads, iPod touches and iPhones. We believe that the above described ways will be mixed and matched depending on grade, subject and availability of reliable internet connections.
