

GET USER-FRIENDLY, ADMINISTRATOR-LEVEL SECURITY

Aspen System Administration

The screenshot displays the Aspen System Administration interface. At the top, there is a navigation menu with tabs for Pages, District, Student, Staff, Attendance, Conduct, Grades, Assessment, Schedule, Global, Tools, and Admin. Below the menu, there are sections for 'All Tables :: Address ::', 'Audited Record', 'Changes', and 'Related changes'. The 'Audited Record' section shows details for a user named 'Thompson, Pam' with a last name of 'Kingham' and a first name of 'Pam'. The 'Changes' section contains a table with columns for Field, Previous value, Changed value, and Current value. The 'Related changes' section shows a table with columns for Instance table name, Change type, Audit changes abilities, and Blank view.

Field	Previous value	Changed value	Current value
Address line 1	210 Thompson Farm Avenue		210 Thompson Farm Avenue
Street type	Avenue		Avenue

Instance table name	Change type	Audit changes abilities	Blank view
STUDENT	Staff		

Ensure a safe, secure digital environment for your student and school information.

Superior Security Features

The web-based Aspen Student Information System platform offers administrators multiple layers of data transmission security.

- At the network level, all data transport is encrypted using Secure Sockets Layer (SSL) technology
- At the application level, administrators can assign security tags to manage Aspen user access
- Aspen also provides more than 20 predefined, customizable roles that allow you to create your ideal protection strategy

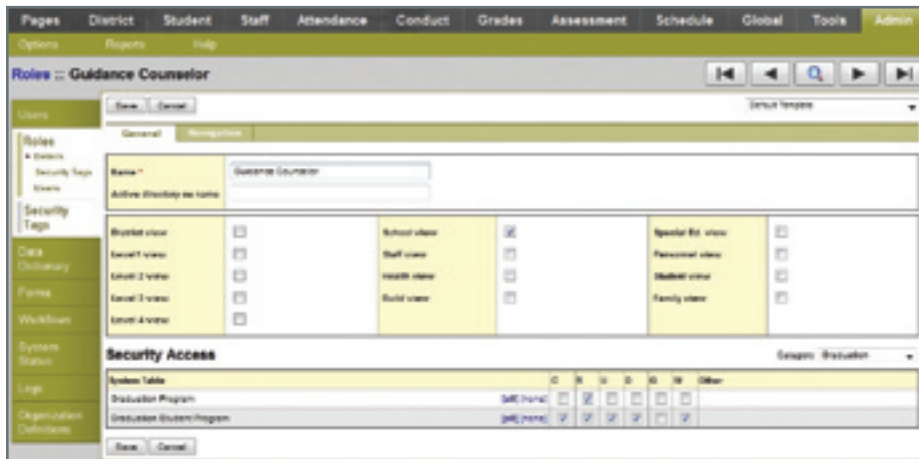

Support your strategy for administrative excellence and student success with the Aspen Student Information System, a state-of-the-art data platform from Follett Software. Aspen houses all of your data, so you can easily find it, report on it, analyze it and use it to the fullest extent. A single, web-based system means one system to learn and one system to maintain—and one place to go to find the resources you need. Because Aspen is completely customizable, you can modify it to look exactly the way you want it to look and do what your district and schools need it to do. Aspen provides all the tools you need to run your schools, including:

- System Administration
- State and Local Reporting
- Master Schedule Builder
- Teacher Gradebook
- Health Management
- Attendance and Conduct Records
- Professional Development
- Special Education
- Family and Student Portals
- Teacher Webpages

Establish Preferences, Assign Permissions

Aspen's District view is where administrators regulate various levels of permission and build separate district and school preferences.

- Set up district-wide preferences like security and enrollment, then let each school customize available preferences as they see fit
- For example, take high school attendance by period and elementary school attendance by homeroom
- Protect course catalog information at the district level, then grant varying levels of access across specific schools

Configure District and School Settings

No two schools function exactly the same. You need a solution that provides district-level control while giving individual schools the freedom to tailor Aspen to their specific needs.

- Restrict access to certain domains or Internet Protocol (IP) ranges by instituting a strong password policy
- Track Aspen logins by start- and end-date and time, IP address and the number of pages viewed
- Use the Tool log to track job performance history

Personalize Your Aspen Experience

System administrators can add an unlimited number of user-defined fields to Aspen's Data Dictionary. Also, rearrange fields on pages and create custom reports.

- Store and quickly access essential district-wide and school-specific information
- Modify the user names assigned to any table or field to the ones users are familiar with
- Let in-house staff customize the system themselves, saving time and money

“Aspen is more than an SIS. It's confidence in knowing that all your data is being maintained on a nightly basis, assurance in knowing that you'll have the ability to retrieve anything you need at any time, and it's security in knowing that any problems will be professionally handled by the technical support on the other end of the phone.”

– SARA HOLOGITAS, DATA MANAGER,
ROCKLAND PUBLIC SCHOOLS,
