Safe School Ambassadors® Are Effective

A two year study by two different universities found statistically significant evidence of positive impact:

Suspension rates were 33% lower than prior to SSA implementation,

while suspension rates at demographically matched non-SSA control schools increased 10% in the same period.

Based on the results of the two-year study, the Safe School Ambassadors® Program is now listed in SAMHSA’s National Registry of Evidence-Based Programs and Practices

“It’s easier to build strong children than to repair broken men.”
